

CHOSEN PART OF THE LANDSCAPE - TIVOLI PARK

How to access & Location

GEOGRAPHICAL COORDINATES: 46.0539124, 14.4918700

The selected part of the landscape in Tivoli Park is on the edge of Plečnik's Summer Theatre, in the direction of the Rožna Dolina. Along the left edge (if we are looking towards Rožnik and a bit up and on our right side is the MGLC – Graphic Centre) there is a small brick at the edge and a staircase next to it. At the top of the staircase we immediately turn right and just a few steps ahead is a section bounded by two trees and one pile, most likely formed from excavated roots at the fall of the tree. The approximate location is indicated by a yellow circle. In the photo below, the selected particle is marked with a yellow line.

A close-up:

The fragment is bounded by three points: two trees and a bunch in front. The right tree and the pile are lightly marked with blue woolen thread.
